

FRENCH PAVILION ANALYTICA

Germany
Munich
June 21 to 24

Team France Export was created to help French businesses succeed abroad. Supported by Business France, the French Chambers of Commerce and Industry and France's public investment bank, Bpifrance, Team France Export brings together all the expertise of its founders with that of public and private key players, helping businesses to expand into the export market.

BUSINESS FRANCE

Business France is the national agency supporting the international development of the French economy, responsible for fostering export growth by French businesses, as well as promoting and facilitating international investment in France.

It promotes France's companies, business image and nationwide attractiveness as an investment location, and also runs the VIE international internship program.

Business France has 1,500 personnel, both in France and in 58 countries throughout the world, who work with a network of partners.

Since January 2019, as part of the reform of the state support system for exports, Business France has given private partners responsibility for supporting French SMEs and mid-size companies in the following markets: Belgium, Hungary, Morocco, Norway, the Philippines and Singapore.

LA FRENCH FAB

The need to take action in favor of a sustainable world, the priority to respond to social and climate issues, demand much from us. We need a change of direction, a profound transformation, a new revolution – the “Solutions Revolution”, incarnated by “La French Fab”, the new face of France’s industry.

Since industry produces what we consume, it holds the solutions to a prosperous and inclusive new world. Empowered by its past, technological expertise, know-how and talent, industry is the solution to many current and future challenges.

Launched in 2017, La French Fab is supported collectively by the Alliance Industrie du Futur, Bpifrance, Business France, France Industrie, the Direction Générale des Entreprises and France’s regions. These key players are committed to an eco-friendly approach and concerned about the common good. In France and around the world, they’re working to renew the industrial sector, reinvigorate France’s regions, make industrial jobs more attractive, and draw attention to French industrial excellence.

With La French Fab, experience industry in a new way. Together, let’s inspire a new world.

#FrenchFab

ALPHA-RLH is a French Competitiveness Cluster specialising in Photonics-Lasers and Microwaves-Electronics technologies. Its mission is to support companies and laboratories in setting up, evaluating and financing innovative projects. As a performance and innovation accelerator, ALPHA-RLH also helps its members to implement digital solutions to achieve their objectives. This technological expertise is put at the service of different application markets: Health (Medical Devices & Autonomy), Communications-Security, Aeronautics-Space-Defense and Energy-Smart Buildings. Become a member and benefit from a rich ecosystem to develop collaborative innovation projects in Europe and internationally!

www.gasmix.com

AlyTech is a France-based company founded in 1999 and headquartered in Paris region. We are strong team of chemists, electronic and software engineers with long experience in gas systems, chromatography and elementary analysis.

Since 2007 we develop, manufacture and sell gas mixing/blending/injection systems under GasMix™ brand. Our automated and precise gas mixers & diluters are widely used in industry to perform multi-point calibrations, linearity checks and LOQ/LOD validation of gas analysers, elemental analysers, GC detectors, spectrometers. The application areas also include generation of complex synthetic gas mixtures for testing of interferences, development and validation of chemometrics models for spectrometers, engine bench tests, emission control, and many others.

We offer you high quality instrumentation, comprehensive application expertise, and perfect service. Our international network of authorized distributors provides you with local support.

AIOLOS II
The intelligent gas mixer
with a dedicated software

BENEFITS:

- Compatible with aggressive gases
- Up to 4 gases
- Smart, intuitive software
- Multiple options/accessories:
heated lines, injection loop, FeD...

NEPHOS
From Liquids to gas standard

BENEFITS:

- Up to 2 liquid channels and 5 additional gases
- Modular, evolutive
- Smart, intuitive, dedicated software
- Generation of gas standards from % to ppb levels

New Product

NOMAD
The portable gas mixer
with a computer embedded

BENEFITS:

- Compatible with aggressive gases
- Up to 4 gases
- Smart and intuitive software
- Portable
- Touchscreen, remote control

Cel.: +33 (0)6 24 35 23 85
djilali.miloud-ali@apixanalytics.com

Energy and environment are major challenges for the next 30 years. The quality control of new energy sources (biomass, hydrogen), the emission control of gases and pollutants and their impact on the environment and health are at the heart of APIX ANALYTICS developments.

APIX ANALYTICS has designed and engineered a range of miniaturized instruments, able to analyze the composition of complex mixtures of gas and liquids, from the lighter gas hydrogen, to heavy crude oils, including volatile organic compounds (BTEX), at level from % to ppb. The analysis is carried out on-site, on real-time, even in dangerous areas (explosive atmosphere), where we used to take samples and send them to the analytical lab, increasing the response time. Using APIX ANALYTICS solutions, our clients can on-time, reduce and control their emissions, optimize their manufacturing process, be alerted in case of malfunctions or when exceeding critical threshold, while making substantial savings (CAPEX and OPEX) " APIX ANALYTICS does not forget Gas Chromatography for laboratory and offers alternative solutions to online

measurement, in gas analysis for Pharmaceuticals & Petrochemistry thanks to Chrompix2®, TwinPix® & AlphaPix® products.

filtraTECH, filtration tailored to your needs

filtraTECH is a French company offering an exhaustive range of analytical filter papers (quantitative, qualitative, standard), glass microfiber filters, special papers (for protection, cleaning, weighing, chromatography...) and amongst other products, microfiltration articles (membranes, syringe filters).

Thanks to the expertise of our team, we accompany and advise our customers, in laboratory and industry sectors, in the choice and development of tailored solutions. Our structure and organization enable flexible and agile responses to our customers' requests; our distributors praise our ability to establish long-term efficient partnerships.

Our ISO 9001:2015 certification attests of our commitment to serve our partners in the most qualitative ways possible.

GoyaLab is an innovant company who is expert in spectroscopy. In 2018, GoyaLab signs a technology transfer agreement with ALPhANOV for manufacturing, development and worldwide commercialization of GoSpectro and its future versions.

In 2020, GoyaLab launched the IndiGo, a compact, connected spectrometer, revolutionary in its modularity for multiple use cases. The IndiGo is at the same time, a visible spectrometer of scientific quality, a fluorescence spectrometer and a spectrophotometer for analysis of absorption, concentration

In 2021 and on the strength of its first commercial successes, GoyaLab is in the process of developing an ultra-portable Raman spectrometer. Development continues....

INTERSCIENCE designs and manufactures in France an innovative product line to perform quick and safe microbiological analyses, from sample preparation to bacterial enumeration.

INTERSCIENCE is a major player in quality control for agrofood, pharmaceutical, cosmetics industries and for medical, environmental and fundamental research.

INTERSCIENCE is proud to present its last innovations at Analytica :

ScanStation is a real-time incubator and colony counting station : a revolution for analyses in microbiological labs !

RollBag is a sampling bag with a sticker closure for sample collection, transport and analysis of all types of any liquid or solid sample.

instaBAG is a ready-to-use filter bag which includes a dehydrated pre-dosed media, allowing a 2-in-1 process for the detection and enumeration of *Listeria monocytogenes*.

Boutros KERBAJE

CEO

Ph.: +33 (0)4 74 13 03 02

info@libios.fr

LIBIOS, is a French Biotech company, established in 2006 by Boutros KERBAJE. Founder and manager, he has extensive scientific and commercial experience in the field of tests and analysis as well as diagnostic solutions. Specialized company in the development, production, marketing and distribution of kits and reagents for quality, safety and traceability in the food/feed, environmental and bioanalysis sectors. Our focus was always been on helping customers find appropriate technical solutions to ensure safe food for the world's growing population, and we frequently offer our two cents in numerous technical committees. Thanks to our state-of-the-art laboratory and highly skilled technical team, LIBIOS is able to continuously innovate. Commercially speaking, we also make sure that we respond proactively to customers' requirements, and the use of marketing allows us to communicate our messages far and wide. Our novel instruments, such as the UPLC MS/MS system, enable us to be an ultra-efficient lab. Today, we have released up to 20 ¹³C mycotoxins fully labelled. Our expertise in production, extraction and measurement of certified ¹³C stable isotope internal standards guarantees the food safety lab network reliable and safe function, compliant at national, European and international levels. Today, reliable stable isotope labelled internal standards in quantitative analysis utilising LC-MS-MS techniques are an essential part of any reliable analytical approach. Our convenient packaging, relevant concentrations and choice of solvents are advantageous tools for both public and private laboratories, and have been described as such by our customers. Discovery of new food safety hazards and progress in science and technology demands better analytical approaches. As mentioned above, at LIBIOS we centre our efforts on innovation to deliver to such demands. We offer the industry practical solutions that ensure continuous improvement of analytical capabilities, which guarantees safe food for all.
